

Training for Success

What's the Purpose of the SCR TTC

Provide a training resource network comprised of public and private organizations focused on the development of the transportation industry workforce knowledgeable of standards, practices, and procedures.

Our Goals

- Develop a new **"Learning Model"** to increase the professional and technical competency of the Southern California public transit workforce.
- Assure this new **Learning Model** includes the elements of Intelligent Transportation Systems.
- Expand the **Learning Model** on a Regional and National level.

Solutions for Solving One's Training Needs

- Developing standards for transit vehicle repairs
- Improving the quality of training for the entire workforce
- Reducing the duplication of training
- Improving efficiency and effectiveness of training
- Optimizing the educational resource
- Funding resources and better use of taxpayers dollars
- Training needs assessments and analysis
- Inventory of available resources and courses
- State of the art training
- Building training capacity for public transit

Course Offerings in Public Transit Technologies

- DVOM – Digital Volt Ohm Meters
- ITS Applications for Public Transportation
- Transit Electrical
- Transit Braking Systems
- Transit Electronics
- HVAC - Heating Ventilation Air Conditioning
- Multi-Plex Control Systems
